Microsoft
Small Business
Specialist

Seamless Development (Seamless) is a professional 100% US corporation located in the Philadelphia metropolitan area. **Seamless** was founded on the premise that state-of-the-art technological tools should be made available to everyone at an affordable cost.

Our engineers are handpicked experts in their respective fields, and hold résumé entries that include the US Army, Google, eBay, and IBM. **Seamless** is a technology company providing end-to-end services including web development and support services, e-commerce, custom applications, network deployment and administration.

CUSTOM PROGRAMMING

Seamless prides itself on creating customized, scalable web sites and web applications. Each project is built using the bleeding edge development tools and methodologies including .NET 3.5 and AJAX.

Our Web Development staff employs programmers certified in the newest site development tools. Our emphasis on cutting-edge technology results in a website product that is comparatively more feature-rich while demanding fewer resources.

NETWORK ADMINISTRATION

Seamless offers network services including: network infrastructure consulting and design; maintenance of existing networks; and scalable network creation and administration for any size business. Remote help desk support is available via live chat, phone, email, and VPN. Custom server configuration and remote PC backup gives an enterprise-level backup solution for valuable data at an affordable price.

Seamless has Windows networking experts on staff, delivering design, deployment, and administration to small business, remote site, and enterprise networks, including terminal services, DNS, WINS, Exchange Server, Project Server, SharePoint, IIS, and more. We have experience in mixed-environment Windows networking; e.g., integration of Linux or Mac clients. We also offer remote IT administration and helpdesk services.
