

## ABOUT SEAMLESS DEVELOPMENT

**Seamless Development (Seamless)** is a professional 100% US corporation located in the Philadelphia metropolitan area. **Seamless** was founded on the premise that state-of-the-art technological tools should be made available to everyone at an affordable cost. We pride ourselves on innovation, quick project turnaround, and unrivaled customer service, all at competitive prices. At Seamless Development, we see every client as our business partner; when you succeed, we succeed. Our engineers are handpicked experts in their respective fields, and hold résumé entries that include the US Army, Google, eBay, and IBM. **Seamless** is a technology company providing end-to-end services including web development and support services, e-commerce, custom applications, network deployment and administration.

### TECHNICAL SPECIFICATIONS

#### Custom Programming

Each project is built using the bleeding edge development tools and methodologies including .NET 3.5 and ASP.NET AJAX. We create products that are comparatively more feature-rich while demanding fewer resources.

*Programming and Development Technologies:*

*C#, .NET 3.5, ASP.NET 3.5, ASP.NET AJAX, JavaScript, XML, PHP, ColdFusion, SilverLight, Flash, Flash ActionScript, HTML, XHTML, VB.NET, Visual Basic, C/C++, SharePoint, InfoPath, SOAP, WebServices*

#### Database Technologies:

Microsoft SQL Server (2000, 2005, 2008), ADO.NET, T-SQL, SQL Multi-Site Replication, Redundant Data Access Techniques

#### Networking Administration

Seamless has Windows networking experts on staff, delivering design, deployment, and administration to small business, remote site, and enterprise networks. We have experience in mixed-environment Windows networking; e.g., integration of Linux or Mac clients. We also offer remote IT administration and helpdesk services.

*Networking Technologies:*

Active Directory, Windows Server (NT, 2000, 2003, 2008), Exchange Server (2000, 2003, 2007), IIS Web Server (5.0, 6.0, 7.0), Microsoft ForeFront Client Security, Failover Clustering, Load Balancing, Site 2 Site VPN, Dial in VPN, Advanced routing techniques (passing traffic from multiple remote subnets globally), Scalable and High Available Solutions, RRAS, Firewalls, DNS, Expert Windows Networking with Mixed environment clients (Windows OS, Mac OSX, Linux), Windows OS (2000, XP, Vista), Microsoft Office (2000, XP, 2003, 2007)

**Seamless Development** (Seamless) is uniquely able to address many different aspects of our clients' businesses in an all-in-one solution, tailored specifically to meet their needs. We provide end-to-end services including web development and support services, e-commerce, custom applications, and network deployment and administration. Our creative, custom technology solutions are fully extendable to grow as their business grows, allowing further customization and additions down the line.

## THE MANY SERVICES WE OFFER

### FOCUS ON 4 MAIN AREAS FOR YOUR SUCCESS!

#### CUSTOM PROGRAMMING

Our staff, consisting of 100% US developers, uses the most up-to-date technology to ensure feature-rich systems which demand fewer resources and avoids the cost of older, less flexible technology. We work only with proven, widely documented, industry standard technologies and build each project scalable to accommodate your continual business expansion.

#### INNOVATIVE DESIGN

Seamless Development specializes in unique and eye-catching design from the ground up – we will work with you to create a functional and captivating design to best present your project; from logo design and branding to full-fledged web application design, our design team is highly experienced and excited to create designs for you!

#### CONSULTING

Our highly experienced team is always excited to create solutions to streamline businesses and incorporate what is needed to make each client a success. We will review your current processes and come up with a game plan to make your business run as efficiently as possible with the latest technologies.

#### NETWORKING SOLUTIONS

Seamless Development offers a multitude of network services including network infrastructure consulting and design, maintenance of existing networks, and scalable network creation and administration for any size business.
